Portfolio

PROFESSIONAL SUMMARY

IT Analyst student at Universidad ORT with hands-on experience building full-stack web applications with React, Node.js and Java (Spring Boot), and a current role monitoring live sports data at Sportradar. I combine solid JavaScript fundamentals with accuracy under pressure and professional English. Looking for my first developer role in a collaborative team.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), HTML5, CSS3, React, Redux Toolkit, React Router, Bootstrap, responsive design

Backend: Java 21, Spring Boot, Maven, Node.js, Express, REST APIs, JWT authentication

Concepts: Design patterns (State, Strategy, Observer, Facade), MVP architecture, Server-Sent Events, concurrency

Databases: MongoDB (Mongoose), MySQL

Tools: Git, GitHub, Postman, Vercel, VS Code

Familiar with: TypeScript, Next.js, C#/.NET, SQL Server

PROJECTS

Librería – full-stack book management app Node.js · Express · MongoDB · React · Redux

- Built a REST API with JWT authentication, role-based access (user/admin) and plan-based limits (plus/premium).
- Developed the React frontend with Redux Toolkit, React Router, Formik + Yup validations and a global loading state.
- Integrated Cloudinary for image upload and management, the Google Books API for book search and an AI-powered recommendation endpoint.
- Added usage reports and charts (Chart.js) and a plan-upgrade flow. Frontend and backend deployed on Vercel.

Battleship – multi-user web game (team project, 2026) Java 21 · Spring Boot · Maven · JavaScript

- Human vs. computer web game using an MVP (Passive View) architecture, with a Java 21 / Spring Boot server and an HTML, CSS and JavaScript client.
- Modeled battle states with the State pattern and computer tactics with Strategy (sequential, spiral and hunt-and-target).
- Implemented real-time updates across browsers with Observer and Server-Sent Events (SSE), without page reloads.
- Enforced business rules with custom exceptions and handled simultaneous moves with synchronized concurrency control; collaborated through Git/GitHub.

PROFESSIONAL EXPERIENCE

Production Analyst – Sportradar, Montevideo, Uruguay 12/2025 – Present

- Monitor and validate real-time data for multiple live sports events simultaneously, ensuring accuracy and consistency of data feeds.
- Detect and resolve data inconsistencies under time pressure, working with technical and operational teams to protect data integrity.
- Use internal tools for data analysis, tracking and reporting; work daily in English.

EDUCATION

IT Analyst (Analista en Tecnologías de la Información) – ORT Uruguay 2025 – Present

Technological Baccalaureate in Computer Science – Escuela Superior de Informática
